Preliminary - Just Discovered This Morning Tue 18 MAY 2021

19.3% of the votes cast in Helena Township appear to Be Not Reported on the EMS Dated 21 NOV 2020

176 Presidential votes are unaccounted for in the November 21 EMS report. This indicates that the vote totals were incorrect, and it indicates a manipulation of the vote count.

After decrypting and decoding the actual results file contained on the compact flash cards from Helena Township. We are able to filter out any effects due to the internalMachineID being renumbered between 9/29 and 10/23 Project files (the shift that occurred during the election). The following discoveries have been made:

Figure 3 - Output from Decrypting/Decoding of Compact Flash Result File from Helena Township from Original Forensics Image

Straight Party ticket vote: Biden 136, Trump 254

Presidential vote chosen specifically: Biden 217, Trump 306

Therefore, totals when the Straight Party ticket vote is added with the direct Presidential vote are: Biden 353, Trump 560

There were 913 votes cast in the Presidential contest according to the Helena compact flash result file when properly decoded using the Sept 29 project file (with the original internalMachineID numbering before the shift occurred).

176 Presidential votes are unaccounted for in the November 21 EMS report.

Biden vote count was reduced by 47 and Trump vote count was reduced by 129 from what they were anticipated to be based on forensic analysis of the Helena Township compact flash cards. This indicates that the vote totals were incorrect, and it indicates a manipulation of the vote count.

Under the penalties of perjury, I declare that I have read the foregoing report and that facts stated in it are true.
